

## Cessna CJ1

Equipment Specifications	
Year	2001
Manufacturer	CESSNA
Price	USD 1.695 M
Location	South Africa
Serial No	TBN
Total Time	1958 HRS
Number of Seats	5

**General Information**

Beautiful low time CJ1 with new 2012 interior on Cesscom w/Pro Parts & Power Advantage Fully up to date. Priced to sell.

**Detailed Description**

**Airframe:**

1958 Hours / 1709 Ldgs

**Engine Specs:**

Two Williams FJ44-3A-24 turbofan engines are installed, one on each side of the rear fuselage in easily accessible nacelles. This engine is a 2.20:1 bypass, twin-spool design with 5 compression stages and 3 turbine stages and produces 2,490 pounds (11.08 kN) of takeoff thrust at sea level, static conditions, flat rated up to 72° F (22°C).

Dual channel Full Authority Digital Engine Controls (FADECs) provide automation and efficiency in engine management. Detents in the throttle quadrant for takeoff (TO), maximum continuous (MCT), high speed cruise (CRU) give pilots the optimal power settings for each phase of flight based on ambient conditions. The system also provides time-limited dispatch (TLD), diagnostics, and engine synchronization.

Engine overhaul is required at 4,000 hour intervals.

**Avionics/Radios:**

Collins Proline 21 IFCS Two Tube EFIS  
 L3 Landmark TAWS 8000 Class B  
 Dual Honeywell Mode S Transponders
